A Frontend Developer with the ability to develop and test websites using the latest technologies/stacks such as ReactJS, NextJS, and TailwindCSS. I have worked on more than 5 projects, both individually and as part of a team.

I have over 1 year of experience working in several technology companies as a developer. I previously worked at Majapahit Teknologi as a Backend Developer, where I developed projects using the ExpressJS framework and PostgreSQL as the database. I also have experience working as a Frontend Developer at Orion Scope using the ReactJS library and NextJS framework.

I am capable of working effectively both as an individual and as part of a team. I have a strong interest in advancing my career in Frontend Development. With the Growth Mindset I possess and a strong desire to continue learning, I always keep myself updated with new knowledge related to rapidly evolving technologies.
